Abstract,

Glossery

The Sun is a Universal sky clock composed a hour hand , a minute hand and a second hand having always tick tick by the day and night through $C/1$ sec and $1/C$ sec.

Other this Univers is fill-up by the events. This events occurrence by the infinity of particles which made by protan and nutran and protan,nutran made by three quarks.(2 down,1up),There each event is a clock of each particle respectively. Any event occurrence dependence on the origin Universal sky clock through $C/1$ sec and $1/C$ sec

Conclusion,

Notice,any clock can't tick tick without space time motion and force of $c/1$ sec and $1/C$ sec. The Sun provides all this materials to the Universals sky clock.
