

ON GRAVITON BOMBS – Project Report

S.Kalimuthu, 2/394 , Kanjampatti P.O, Pollachi Via, Tamil Nadu 642003,India

parabrammam@yahoo.in

According to Einstein's STR (Special Theory of Relativity) matter and energy are equivalent. i.e. Matter can be converted into energy. In 1945, 40 years after the publication of $E = mc^2$ result, the atomic bombs were made. Nowadays several countries are in possession of modern powers.

In 1986, M. Philips, graduate student of Princeton University proved that the manufacture of micro atomic bombs are possible. To make an atomic bomb several costly raw materials are required. The preparation process is very dangerous. A very huge amount of money is needed. It is possible for a replica of an atomic bomb? And also without any raw materials and facing risk of process? The answer is yes. The alternative candidate to the atomic bomb is a graviton bomb.

According to Einstein's general theory of relativity, we should not separate gravity from space. It is a part and partial of space. Even light can not escape from black holes but the black holes can not detain gravitons. Needless to say, we can switch on and switch off TVs at our home by remote control. Even satellites which are away from several lacks of kilometers are remotely controlled. Similarly let us try and control the gravitons. If we could control gravitons, we can transform gravitational force into nuclear strong interaction force. By merely sitting at our home on earth, we can do the wonders say in the moon, mars, mercury etc..

One may assert that it is purely impossible. Let us recall Napoleon Bonaparte, the famous French Emperor's, most quotable sayings: "The word impossible should be taken away from the dictionary". The author deduced the fifth Euclidean's postulate from the other four postulates [1], [2] and [3]. This proposition, which is 2300 years old, was established by, Lobachevskii, Bolyai, Gauss and Riemann that it is impossible to prove.. So I politely but confidently declare that we can be successful in the implementation of graviton bomb project.

"Imagination is more important than knowledge" – Albert Einstein

GRAVITON WARS

Everything came from space. Gravity is everywhere in space. We can't separate gravity and space. Both are interlinked. There are five kinds of forces .viz gravitational, magnetic, electric, nuclear weak interaction and nuclear strong interaction forces. Maxwell unified electric and magnetic forces. It is called electromagnetic force. Abdus

Salam and Steven Weinberg unified electromagnetic and nuclear weak interaction forces. This is called electroweak force.

Physicists are attempting to unify electroweak and nuclear strong interaction forces with gravitational force. It is believed that this theoretical effort will be achieved shortly. But the experimental verification will remain untouched. It means that we have to convert electromagnetic and nuclear forces into gravitational force. If one can be successful in this he/she is definitely the Generator, Operator and Destroyer of this Universe.

A Cautionary Tale:

The eminent Nobel Laureate physicist Prof. Ms. Lynda Johnson, 41, lives in Florida. She has been working hard to convert gravitational force into nuclear force and nuclear forces into gravitational forces for the last 15 years. Many brilliant research assistants are also working with Prof. Lynda. Ms. Lynda is successful in her efforts. She could be able to convert gravitational force into nuclear strong interaction force. The name of her invention is Graviton – Remote – Control.

Allen Brutus is the most dangerous and wicked Mafia Chief. One of Ms. Lynda's associates is Miss Diana Rossi. Miss Diana is the concubine of Brutus. With the help of Diana, Brutus kills Prof. Lynda Johnson and steals the Graviton – Remote – Control.

Brutus uses Graviton – Remote – Control (hereafter called GRC) for evil purposes. When he clicks the “destruction button” the important offices, industries, dams, research centers etc., explodes into pieces and ashes. GRC converts gravity around those places into strong interaction force and everything burns in a minute. All the combined forces of army, navy, air force and ICBM (inter continental ballistic missiles) could not even reach the head quarters of Brutus. The reason is that Brutus has built with the help of GRC a strong graviton fence around his place. When all the sophisticated destruction missiles and robots approach the graviton fence, it swallows and nothing happens.

Brutus blackmails world leaders and people to obey him. His ambition is to rule the whole earth. He says that he is the GOD. All the effort, to defeat Brutus fails on earth.

Dr. Moses is one of the old students of physicist Lynda Johnson. He attempts to invent an antidote for GRC. Ultimately, after perpetual attempts round the clock, he has found an anti graviton remote control (Hereafter called AGRC). AGRC destroys graviton force built by Brutus. And, thank God, AGRC makes GRC vanish into gravity – space. Brutus is captured alive and put behind the bars
