

Dear Prof. Kanarev,

I am very surprised that there are deep physical errors in Russian textbooks. Seeing the evidence you provided in your article "Errors in physics and chemistry textbooks for 5-6 grades", I have to accept that fact. Could you be interested in research on how some controversial themes are presented in Russian physics textbooks for primary and secondary school? If we do good work, the results might be published in respectable pedagogical and research journals in physics education. That work would be very interesting because the physics is taught in Russia is almost unknown in the West. Do you have access to archive of the pedagogical journal "Fizika v shkole"? Hoping you might be interested in a joint research and professional communication, I send my best wishes

Josip Slisko

Autonomous University of Puebla,
Puebla, Mexico. 14.12.2014.

15.12.2014. To Mr. Josip Slisko,

Dear Mr. Josip Slisko,

Thanks for attention to scientific publications on my personal scientific site

<http://www.micro-world.su/> Every days its visit about 400 readers from the different countries of the world. It is a pity, but you do not know till now that there is more than half of scientific information in school and university textbooks on the physicist and to chemistry is deeply erroneous in all camps of the world.

Russia – the first country in which reliability of existing physical and chemical knowledge already is studied more than 40 years. Result: it is established that in heads of academicians of all countries and in heads of winners of all scientific awards, including Nobel Prize, more than 70 % of deeply erroneous theoretical physical and chemical knowledge. Nature laws are uniform, and the person has divided them into physical and chemical laws, and has lost touch between them. I have understood it more 40 years ago and have started to search for the reasons of occurrence of scientific errors and - to correct them.

Result: my personal scientific site **<http://www.micro-world.su/>** is in the lead by quantity of the scientists visiting it. Russia the first country in the world already has absolutely new textbooks:

1. Kanaryov F.M The general physics.

<http://www.micro-world.su/index.php/2013-09-12-04-46-36/1177-2014-10-29-17-44-18>

2. Kanaryov F.M Physics of a microcosm.

<http://www.micro-world.su/index.php/2013-09-12-04-46-36/976-2013-09-12-06-10-49>

3. Kanaryov F.M The theoretical mechanics.

<http://www.micro-world.su/index.php/2013-09-12-04-46-36/1179-2014-11-16-04-57-14>

KANAREV F.M. THE THEORETICAL MECHANICS. The textbook

It is the first-ever textbook on the Theoretical mechanics with the corrected the First law of Dynamics of Newton. New set of laws of movement of material points and bodies is named «MECHANODINAMICS». The new concept helps to distinguish laws of mechanical movement of firm bodies from laws of Hydrodynamics, Aerodynamics, Thermodynamics.

In the textbook examples of the decision of mechanical problems which had no decisions in Newton's dynamics are presented.

4. Kanaryov F.M.Examination of fundamental sciences. The textbook on interdisciplinary knowledge.

<http://www.micro-world.su/index.php/2013-09-12-04-46-36/1162-2014-08-26-13-42-13>

5.Kanaryov F.M.Monograph of a microcosm.

<file:///D:/Archive/%D0%9C%D0%9E%D0%9D%D0%9E%D0%93%D0%A0%D0%A4%D0%98%D0%98/%D0%98%D0%97%D0%94%D0%90%D0%9D%D0%9D%D0%90%D0%AF%20%D0%9C%D0%9E%D0%9D%D0%9E%D0%93%D0%A0%D0%90%D0%A4%D0%98%D0%AF/%D0%9E%D0%B1%D0%BB%D0%BE%D0%B6%D0%BA%D0%B0%20%D0%BC%D0%BE%D0%BD%D0%BE%D0%B3%D1%80%D0%B0%D1%84%D0%B8%D0%B8.pdf>

Dear Mr. Josip Slisko,

You know that Russia carries out now reform of the academy of Sciences and formation reform, considerably advancing in this important issue all countries of the world.

All kind. The professor, Kanaryov F.M. of 12/15/2014.
