

About 10 years ago while watching the series "Ancient Aliens" I noticed in one of the episodes something that looked like a flying saucer. As then and now I wonder if this "something" was deliberately added by the organizers of the series, although I do not see the purpose of it, or is it really a UFO? In the attached picture, the alleged UFO can be easily seen in the middle of its upper, darker part. It certainly resembles the possible UFO shown in the Pentagon's "Gimbal" video.
