Abstract

In 2012, I declared my prediction that Higgs Boson may not be God Particle. To get it, you must go further up to $1/c$ sec.

Demonstration

In Oct/ Nov 2014, Pro. Frandson Denmark University has been declared by the experiment that Higgs Boson may not be GOD Particle, but it may be Taknny –Higgs

Conclusion

It is clear that my prediction came in truth that Higgs Boson may not be God Particle.

Note

Another my predictions are as below:

- $E= MC^{-2}$ At first time published in the world
- Absolute time
- There can be Universal clock – Stephen Howking
- Theory of relativity showed that there could be no such concept. – Einstein.
- There can be the only SUN which is a Universal sky clock —Suklal Vispute
