Abstract: An allegory of modern science.

The Cairo Affair: Part Three...I Have a Dream!

R.Q. (nonchalantly dunking a cookie in his glass of milk and taking a bite):

“Not to change the subject, Son...but did you catch the latest Behizy and Julie Green videos?”

E.Q.: “Sure did, ‘One, if by land, and two, if by sea’! What a wild period we’re living in: China virus, swamp creatures, censorship, the ‘insurrection’ election, the imposter ‘frail’ O’Biden, the lamestream media (liar, liar, pants on fire), the fraudulent administration, the campaign to destroy truth, justice (and the American way), freedom, religion, mom and apple pie—in short, to enslave the world!”

R.Q.: “Thank goodness we have the YouTube underground—those forensic audit patriots, out there on the frontlines, crouched over their wireless, tapping out coded messages of résistance—the new foot soldiers of God, ‘charging Hell with a squirt gun’! Sure gives you hope! What an exciting new movement: Science, religion, and politics coming together?”

E.Q.: “Yeah, how about all those prophecies of God coming to ‘part the Red Sea’ and flood the world with truth—to bring Trumpy out of exile, straighten out the whole mess, and lead us to the Promised Land? Can you imagine...God Himself coming?”

R.Q.: “I never thought I’d live to see the day. It’s overwhelming. Imagine: a world free from evil and corruption, finally able to breathe the sweet air of truth, freedom, and peace? Can’t wait for that! I feel like a kid at Christmas! Can’t even begin to conceive what life will be like: stepping into a new era of enlightenment, no more sickness, no more war... everybody having one point of agreement—that God exists! Hallelujah!”

E.Q. “Whoa, ‘Heaven let your light shine down’? Yeah, Pops, I’m inspired, too. And to think we even caught the edge of that seventh wave of truth ourselves! Still can’t quite believe we just solved the mystery of the Great Pyramid!”

R.Q.: “Talk about higher math! But before we get too carried away (and get jinxed by a sphinx), maybe we should go over it one more time, Son. You know...just to make sure.”

E.Q.: “Right, Dad. But it sure gives you pause, doesn’t it? Moses and the Israelites encamped by the sea in front of Pi-hahiroth—‘Pi’ was where God parted the waters!”
