The Cairo Affair

Part Fourteen: The Devil You Say!

D. and S. Birks

March 2022

Editing contributions by Daniel Birks

Abstract: An allegory of modern science.

The Devil You Say!

Melania: *"You're a very mysterious group, I must say."*

Fauci: *"How so 'mysterious,' Mrs. T?"*

Melania: *"Well, Tony darling, for one thing, you all appear to be of different nationalities, spread worldwide. I have a theory about you and your 'elitist' friends..."*

Fauci: *"Correction. My associates."*

Melania: *"As a matter of fact, I think you're doctors...evil ones, I mean. You're going to the heart of the jungle, where human life is cheap, to perform ghastly experiments which require the sacrifice of millions of the unsuspecting on the altar of so-called 'science'!"*

Ah! Beat the Devil! Remember that old "Bogie" flick? Conspiracy theorist, how about a conspiracy realist? Even way back when, they had the globalists pegged—just like today: the whole kit and caboodle of evil politicians and criminals with their "Dr. Mengele," trying to take over the world, brazenly declaring:

The more we do to you, the less you seem to believe we are doing it.

*Well, I'm a believer now! I'm finally starting to see the truth—how easy it'd be to lose our freedom. The smug little Canadian fuehrer (Trudolf) sure gave us a wakeup call! That was epic...the stuff legends are made of! An army of police, soldiers, and black ops U.N. goons with body armor, helmets, shields, batons, mace, tear gas, drones, snipers raining rubber bullets, and 2000-pound crowd-trampling steeds! And, standing firm against this crushing force of tyranny, armed only with truth, faith, peace, the might of right (and their ubiquitous smartphone cameras!) Hooray! Hooray! Peace and truth carried the day! Kudos, heroic Ottawa knights! What an example of courage! To fight for freedom with peace? Now it's our turn! (Don't stop believin' Hold on to that feelin' **HOLD THE LINE!**)*

*At least we got a taste of what life would be like under the "Orwellian" minions of a new world order Third Reich! A fairy tale of false "peace" enforced by totalitarianism, censorship, intimidation, persecution, mass surveillance, doxxing, confiscation of bank accounts, and intellectual lockdown. No more freedom, period! A crime to be on the political right, a crime to speak the truth or speak your mind, a crime to be a Christian or practice your religious faith, a crime not to take the death jab! In short: a crime to be alive! And the tyrants' slogan (as they lead you to the gas chamber): C'mon, man (they say), it's easy to avoid arrest and distress: **Just do what we say, everything will be okay!***

Right. And if you believe that, I have some swampland in D.C. for sale (creatures included)!

Truth be told: It's a classic struggle of good vs. evil!

Led by their demon "Destructio-o-o-o-n!" the Klaus Schwab World Economic Forum-backed despots thought they had all the moves covered on the checkerboard. (That's right—they're not smart enough to play chess!) But, uh oh! (Drats, foiled again!) Now they've discovered they've got a tiger by the tail! God will prevail! He's fixin' to spank some globalist heinie!

So much for the "United Nations of Fear"! Yep, the globalists' game of lies, intimidation, wars and rumors of war—devised to undermine economies, countries, create chaos and ultimately destroy humanity—is going to hell in a handbasket! Satanic Panic? Now fear is overwhelming THEM! "They have lost! We have won!" They were doomed from the start! And they tried so hard to bury the truth...like the truth about Phony Joe. (I wonder where the real "Biden" is buried? Probably somewhere in the Deep State!) Yet ironically, all their dastardly deeds only created their own worst nightmare: A world awakened and increasingly united against them in faith, freedom, peace and truth!

Psych? Huddled together beneath the streets taking shelter from the screaming rockets? No! I see a world joyously marching out of the valley of darkness into the light of life, the drums pounding, and everyone singing! I can't understand all the words, but the voices are joined in harmony, praising God in the new international language of deliverance and peace!

But what does all this have to do with math? Well, in a world controlled by lies, it's not as in-your-face obvious as hundreds of thousands of fake "O'Biden" votes, or Orwell's $2 + 2 = 5$. But the Theory of Relativity—that darling of dystopian math—is the Devil's own philosophy of lies stated in an equation! Yep, with the ol' Lorentz "transform truth into a lie equation," Satan unleashed a "math-demic" (a gamma variant) engineered to corrupt all science:

$$\gamma = \frac{1}{\sqrt{1 - \frac{v^2}{c^2}}}$$

Mwahahaha! Diabolically illogical? Yeah, the lie is so subtle. I'll show you what I mean. Let v be any velocity and c the velocity of light:

- If v were equal to c , the ratio of v^2/c^2 would be $1/1$. And subtracting this $1/1$ ratio from 1 results in trying to take the square root of zero and also divide by zero.*
- On the other hand, if v were greater than c , the ratio of v^2/c^2 would be greater than 1 . And subtracting this ratio (greater than one) from 1 results in trying to take the square root of a negative number.*

So as both of these are math no-no's, and the only option left is that v has to be less than c ,

that's how the Devil created his imaginary "light limit" with math! And with that bit of twisted logic, the math world was in lockdown! This equation was hailed as "proof" that it's impossible for any velocity to equal or exceed the velocity of light!

(Impossible, you say? Right. That's the Devil's trademark—to deceive you into believing the lie! But with God nothing is impossible!)

Course, it's easy to see through the lie of relativity:

1) If I replace the velocity of light, c , with any other velocity (let's say that of a slithering, slippery swamp creature), ssc :

$$\gamma = \frac{1}{\sqrt{1 - \frac{v^2}{ssc^2}}}$$

Now the equation has the velocity of a slippery swamp creature as a "limit" no other velocity in the universe can equal or exceed! So, how do you like your math, superluminal or super-swampy? Either way it's super-ridiculous! The limit, like the mathematics, is meaningless!

2) In the ratio of v^2/c^2 , when you divide velocity by velocity, $\gamma = \frac{1}{\sqrt{1 - \frac{(velocity)^2}{(velocity)^2}}}$

by removing the dimensions of velocity—with just numbers, you can create a zillion imaginary dimensions! And as long as the value of the exponent is the same for v and c (whether it's 2 or 2,000,000), relativity has the same make-believe "limit" for light:

$$\gamma = \frac{1}{\sqrt{1 - \frac{v^2}{c^2}}} \quad \text{or} \quad \gamma = \frac{1}{\sqrt{1 - \frac{v^3}{c^3}}} \quad \text{or} \quad \gamma = \frac{1}{\sqrt{1 - \frac{v^{2000}}{c^{2000}}}} \quad \text{or} \quad \gamma = \frac{1}{\sqrt{1 - \frac{v^{2,000,000}}{c^{2,000,000}}}}$$

(And obviously: If you can't exceed the velocity of light c , what the heck is c^2 or c^{2000} , etc.?)

3) Now the kicker! Subtracting velocities, v^2/c^2 , from a non-dimensional number 1?

$$\sqrt{1 - v^2/c^2}$$

Once you eliminate the dimension of velocity, the number 1 becomes the real limit.

(To put this another way: If the ratio, $\frac{v^2}{c^2}$, has to be less than one...one is the only real limit!)

So now you can see the Devil's hand! The equation of relativity is really saying:

Nothing can equal one! There can be no unity!

That's insane! Think about it: All math is based on the concept of one (unity).

So if you can't have one (and therefore, no unity), you can't have math! And without math, where does that leave relativity? Einie's shiny heinie is left out in the cold!

(Ooh! And no unity...no togetherness? That's just sad!)

Long story short, that's how relativity created its warped and skewed false reality!

*By claiming that nothing can equal one (unity), relativity is really saying math doesn't exist:
There's no concept of one (no number), no Trinity, no God...no nothing!
Existence doesn't exist!*

Now you can see Satan's philosophy: erase and destroy the truth—destroy God, and God's creation—with lies of math!

And to think, Einie was part of the Devil's Great Math Reset way back when!

So what would I say to Einie if I got a chance to sit down with him over a beer?

"Watcha drinkin'...Bud Light or Coors?"

"NO, DUDE! WHAT IN THE @#\$% WERE YOU THINKING?!!!"
