Abstract: -

- 1) Space, time and motion governed by the stage of eternal may invisible is the same as micro.
- 2) Space, time and motion governed by the stage of absolute may visible is the same as rays of light.
- 3) Space, time and motion governed by the stage of corollary may being with this appear universe, is the same as macro.

These three stages may be real fact. There is no state of relative and imagine.

Key words:-

11 fundamental basic partials and higgs boson having Space, time and motion. In the nucleus part of three particles having high energy by $E = mc^2$ in it, which may provenance of cosmogony that is omniscience, omnipotence as God, Soul and Principle, which has got a confer from human being.

Demonstration:-

- 1) For example, let us take human being a question arises that, can you see to yourself face? Nothing, doing, not i. in this situation you may not say, that face is nothing. You may not give a proof about face is present. Finally you compel to believe on another.
- 2) You can see to your stomach but what happing in it? You're unknown about that. This is the stage of absolute is the same as rays of light.
- 3) You can see that your waist (lumbar). You create as corollary world.
- 4)

Most Important

Conclusion:-

- Space, time and motion may exist in three stages as eternal, absolute and corollary.
Proof: 11 fundamental basic particles and higgs boson.
- Cosmogony: micro particle is a cause.
- Cosmology: $c/1$ and $1/c$ is a cause.
- Middle-Point: (nucleus) Creates by the $E = mc^2$. (*See paper 2 internal spherical Geometry*).
- Corollary universe : Creates by the together $c/1$ and $1/c$

Result:

- Each entity (moving non moving) having claim to go from the stage of corollary to absolute and further until eternal.
- This middle point (nucleus) may exits by the mathematically, geometrically and scientifically Soul, God and Principle is a noble confer by the human being

I have no laboratory. My thought is my laboratory. My thought is my qualification.

Request:

Please wait something to put logo on relativity

Note:

In any situation, it will be better to say that this appear universe may corollary more than relative. Because, any event happen by the $c/1$ and $1/c$ in this world, indisputable. *Note*, velocity of light apply for only our galaxy.
