Abstract

This research paper commemorates the 10th anniversary of my 2003 Grand Unification attempt and the 5th anniversary of the 2008 Alan Zeeper's discovery that is changing the course of physics forever. Zeeper eventually finished the work of Einstein and Tesla by stating that $E=mA^2Z^2$ deriving this equation as a product of:

A =Earth's Gravity Acceleration and Z =Earth's Orbit Time (Exact Lunar Year)

This amazing discovery led to the Grand Unification of Gravity and Electricity, something Einstein was looking for the last 20 years of his life. I came up with $E=mc^2$ containing the square of time, Zeeper calls Z^2 and the square of acceleration, but my work ended up in the drawer until May 2011, because I found a different approach to the Grand Unification using $E=mQ^2$ or Consciousness acceleration equation where:

Q =the quantum speed of thinking (in quantum steps per second)

This solution gave the fact that the amount and the velocity of thoughts, multiplied by their frequency leads to the acceleration of the size of the micro-cosmos or Consciousness.

Key words: Einstein, Newton, Tesla, Energy, Frequency, Mind, Brain, Consciousness, Electromagnetism, Electrical-Mass, Gravity, Quantum Mechanics, Speed of Light, Grand Unification.

1) Introduction and the Update of the Alan Zeepers' $E=mA^2Z^2$ Model

The Alan Zeepers Model can be presented using this energy sphere image:

$$\text{Farad} = \frac{\text{mass} \times r}{\text{Diameter Area}}$$

$$\text{Farad} = \frac{m \times 2 \times \text{Diameter}}{\text{Surface Area}}$$

Energy	=	$m A^2 Z^2$	=	36
Velocity²	=	$A^2 Z^2$	=	36
Power	=	$m A^2 Z$	=	12
El. Mass	=		=	1
Accel.	=	A	=	2
Time	=	Z	=	3
Coulomb	=	$m A$	=	2
Volt	=	$A Z^2$	=	18
Amp	=	$m A / Z$	=	2/3
Weber	=	$A Z^3$	=	54
Velocity	=	$A Z$	=	6
Tesla	=	$1 / A Z$	=	1/6
Heat	=	$A^2 Z^3$	=	108
Farad	=	m / Z^2	=	1/9
Ohm	=	Z^3 / m	=	27
Surface Area	=	$4\pi r^2$	=	103.13
Diam. Area	=	πr^2	=	25.78
Diam. Area²	=	$A^2 Z^4 / \pi^2$	=	32.83
Volume Cube	=	$A^3 Z^6$	=	5832
Volume Sphere	=	$4/3 \pi r^3$	=	98.48

(Farad above is for this particular energy sphere.)

Picture 1: E-sphere designed by Alan Zeepers

We can observe a very simple solution to the combination of Energy, Gravity and Electromagnetism once $E=mc^2$.

One good example for calculating Earth's Magnetic Field in Teslas shows that Tesla = $1/v$ or one over earth's velocity. Zeepers proved this fact using this example:

According to Wikipedia, the recorded magnetic field of the earth is 0,00003 Teslas (Wikipedia - 3.1×10^{-5} Teslas is the strength of earth's Magnetic Field on the equator, 0° latitude.)

From www.EinsteinElectricity.com we see that the Tesla is equal to $1/v$ or $1 / \text{Velocity}$. The scientific community doesn't know this yet because they are still unaware that the Volt = Distance = Circumference. The Volt is equal to the Circumference of any energy sphere.

The earth is moving through space at 30,689.1802374659 m/s. When you divide 1 by that velocity ($1/v$) you get the exact Magnetic Field of the earth = 0,00003 Teslas.

Zeepers is right now engaged into proving that the solar mathematics is very simple and is not adapting any units for his calculations as he is using pure mathematics to prove his claims. One of his major findings that needs to be mentioned is that he has proven what has been hidden to us since the 1960s. The speed of light is not constant on the interplanetary level. Zeepers proved that with calculating the speed of light on Mars at:

185.350.924,030313 m/s

For more see: <http://members.shaw.ca/warmbeach/MARS.htm>

Furthermore Zeeper has also proven that NASA is wrong in Mars Gravity Acceleration by $0,6 \text{ m/s}^2$.

Alan Zeeper's latest contribution to better understanding of the solar math has been done with this collection of monumental equations pertaining to Earth and Gravity:

See: <http://members.shaw.ca/warmbeach/EQUATIONS.htm>

All Alan Zeeper equations and calculations prove what Tesla had postulated. Gravity is absolutely the pressure of space upon the earth. In other words Gravity is the pressure of the Aether surrounding the earth. Why does the mainstream science stuck in Gas/Light era not recognize the work of Alan Zeeper? Our scientists and physicists are still claiming that Gravity is the cause of large body masses attracting themselves and curvature of space according to Newton and Einstein? Alan Zeeper stated many times that billions if not trillions of U\$ and EUR are thrown away in transport, surface, water and aerial transport because of this wrong definition of Gravity.

Zeepers has listed 5 top physics discoveries of this 21st century here. Please visit associated links:

1) Only TRUE values for earth are acceptable.

<http://members.shaw.ca/warmbeach/CORRECT.htm>

2) The Pendulum has given us absolute proof that Gravity is a "Pushing" force.

<http://members.shaw.ca/warmbeach/PENDULUM.htm>

3) The "Volt" is the Circumference of any volume of void created within the ether.

<http://members.shaw.ca/warmbeach/BATTERY.htm>

4) The discovery of the direct connection between Pi and the Speed of Light.

<http://members.shaw.ca/warmbeach/MATHEMATICS.htm>

5) The energy "within" Mass is nothing more than space contracting after an electron moves to a lower orbital.

<http://members.shaw.ca/warmbeach/ASTROMATH.htm>

According to Zeeper one needs to be sure to understand that space (the ether) is an ocean of quantum elastic mass. Hence, please do not use the Michelson-Morley results as any sort of opposition to this reality due to the fact that the ether is a Pressure that surrounds and "moves with" the earth and is therefore not detectable.

This Pressure surrounding the earth is the very origin of "all" Electricity upon the earth. When a magnet is run through a coil, it causes an expansion within the elastic ocean of quantum-mass surrounding the earth. Then when any electrical connection is made, the Pressure of space contracts back to its natural place as it pushes free electrons along any given conductor and the result is - Electricity.

We are able to understand the reality of the universe once we finally see our own galaxy as it truly is. See the image on the next page.

The Orbit of the Earth around the Sun + The Orbit of the Sun around the center of our Galaxy.

BLACK = Sun orbit around galaxy center.
ORANGE = Earth orbit around the sun.
Orange HELIX = Moon orbit around the earth.

Wow Go Here . com

Orange end to orange end is
= 30,585,600.0000007 seconds
Exact Luna Year
= 354 days
Orange end to orange end
+ the thickness of the black line
= 365 days
Exact Solar Year
(which keeps Christmas at the exact same season)

The thickness of the black line (the distance the orange orbit must travel) represents both "Time" and "Energy".
The Energy is the combustion of the sun which is what is driving the earth's orbit.

Picture 2: The Sun orbiting the Galactic Center (Lunar and Solar Year)

The fact that the planets below are kept in their orbit via their individual Densities is verified even further by the mathematical definition of energy. The equation $E=mA^2Z^2$ is energy coming off of the sun. Mathematically that is equal to $Heat^2 \times Distance \times Density$, which coincides exactly with what the physical galaxy portrays. Between the sun and planets is $Heat^2$ which exists over a Distance ending in the Density placement of each planet. See the image on the next page.

Picture 3: The Role of Density in solar Planet Positioning

According to Zeeper, the hydrogen and oxygen of our Atmosphere are simply finer "mediums" that permeate the same hydrogen and oxygen of ocean Water (H₂O). The above image shows us how electrical-mass is also likewise the finer medium that permeates both the earth's atmosphere as well as the oceans. Whenever we walk through the medium of water, we are able to both see and feel that medium. Yet when we walk through the medium of air we can only feel that medium. However when we walk through the medium of electrical-mass space, we can neither feel nor see this medium but you can rest assured it is most certainly there, **pushing us down onto the earth.**

Zeeper has also proven that Gravity produces time which was defined as a numerical order of change or motion in 3D by my fellow researcher Amrit Šorli. Zeeper states that because the ocean of electrical-mass that surrounds the earth is what drives the earth's orbit while also being the origin of Gravity, we can easily then see how a connection exists between **Time** and **Gravity**. Time is more specifically defined by motion. All

combusting stars in the universe create the (Pressure x Volume) of space which is also equal to the (Mass x Velocity²) of earth orbiting. Hence we can see the exact reason why each and every method of producing **Time** on earth contains a direct connection to **Gravity**.

To close this Alan Zeeper part of discovery I wish to add some of his monumental words on the 5th anniversary of this amazing discovery that proves Zeeper being the father of the Grand Unification of Gravity and Electromagnetism.

Electricity ($\mathbf{mA^2Z^2}$) divided by one dimension (AZ^2) equals the Coulomb (\mathbf{mA}). Electricity divided by two dimensions (A^2Z^4) equals the Farad ($\mathbf{m/Z^2}$). Both the Coulomb and the Farad divided by the dimension that they exist upon (Area, Distance) is equal to the **Pressure** ($\mathbf{m/AZ^4}$) of electricity, the pressure of gravity, the pressure of electrical-mass that surrounds the earth.

Coulomb (\mathbf{mA}) / Area (A^2Z^4) = the 3-dimensional Pressure ($\mathbf{m/AZ^4}$) of electricity. Farad ($\mathbf{m/Z^2}$) / Distance (AZ^2) = the 3-dimensional Pressure ($\mathbf{m/AZ^4}$) of electricity. Electricity is the direct result of the volumetric contraction of the elastic fabric of electrical-mass that surrounds the earth. This quantum fabric of space becomes expanded when a Capacitor is charged, and as it contracts it pushes free electrons along any conductor. This fabric of space composed of Higgs-Bosons is also know as the ether, the same ether that was not detected by Michelson and Morley due to the fact that it moves "with" the earth through space.

In the next chapter I will just briefly devote some words to $E=mQ^2$.

2) Introduction and the Update of the Andraž Pibernik's $E=mQ^2$ Model

About 10 years ago in May 2003 I was desperately on the search for the acceleration within the Einstein's $E=mc^2$ equation. I came up with this drawing fining time squared and almost defined acceleration squared before the entire research went into the drawer until the 2007 $E=mQ^2$ development and later May 2011 definition as true Consciousness acceleration equation.

Picture 4: Search for the Acceleration within $E=mc^2$, the original Document from 2003

This finding later led to the exchange of the speed of light in the Special Relativity by the quantum speed of thinking in the human brain in steps per second instead of in meters per second.

$E=mQ^2$ is so revolutionary that the science in this reality will need many years to fully comprehend our latest findings of the speed of light being nothing else than the velocity of heat waves of electricity in our atmosphere as Zeeper has also proven that Light and Photons do not exist outside our brain.

I have written two major philosophy Essays on the development of $E=mQ^2$ and would like to refer to them for more information about this amazing Consciousness acceleration equation that is based on the Prospect Theory and the psychophysics of the human perception apparatus called the brain.

- 1) $E=mQ^2$ New Scientific Discipline with a multidisciplinary Approach to defining Consciousness, Energy and Gravity Unification with Electromagnetism:

Link: <http://gsjournal.net/Science-Journals/Essays/View/4713>

- 2) $E=mQ^2$: The Truth about Consciousness and the Evolution of our Reality

Link: <http://gsjournal.net/Science-Journals/Essays/View/5086>

In the second Essay I managed to use the Alan Zeeper findings, the proof that Quantum Mechanics can not give the definition of Consciousness and my $E=mQ^2$ exploration data to define Consciousness as: (page 54)

“Consciousness is the one and only product of the many frequency Heat wave based electromagnetic matrix we all live in making us sentient beings by picking up and sending our signals from/into the environment over our brain and heart coherence which help us to create the picture of reality that corresponds to our individual Consciousness size, our collective mind and our thoughts.”

I have even been given a proof that our reality is simulated and that the true world exists beyond our death. What I am still unable to fully prove is, if such a simulation is a natural or a human and all kind design. One fact and one chapter has been closed for sure, all Quantum Mechanics and spacetime geometry gurus trying to define Consciousness are having it false as they forget that the cosmic mathematics is very simple and our brain has no need of quantum computational operations to generate Consciousness. Nikola Tesla stated a long time ago that both Quantum Mechanics and Relativity with face trouble in the future, well the future in now and both theories are not much of any use nowadays.

My $E=mQ^2$ equation is a powerful Energy/Consciousness/Mind/Thought/Frequency combination that uses the product of Heat^2 and Frequency^2 Torsion Wave algorithm bringing Energy into the c^4 realm or Einstein's original formulation once q or Electrical-Mass is added to the equation. Electrical-Mass is the dough everything and everyone is made of and has no velocity ceiling. That is why we need to replace m or relativistic mass by q or Electrical-Mass to get the full effect of the $E=mQ^2$ equation.

Herewith I wish to close this chapter and this research paper on 10th and 5th anniversary of Alan Zeeper's and my discoveries that are not ahead, but beyond time. Please share our work with your relatives and friends.
