Everything came from space. Gravity is everywhere in space. We can't separate gravity and space. Both are interlinked. There are five kinds of forces .viz gravitational, magnetic, electric, nuclear weak interaction and nuclear strong interaction forces. Maxwell unified electric and magnetic forces. It is called electromagnetic force. Abdus Salam and Steven Weinberg unified electromagnetic and nuclear weak interaction forces. This is called electroweak force.

Physicists are attempting to unify electroweak and nuclear strong interaction forces with gravitational force. It is believed that this theoretical effort will be achieved shortly. But the experimental verification will remain untouched. It means that we have to convert electromagnetic, and nuclear forces into gravitational force. If one can be successful in this he/she is definitely the Generator, Operator and Destroyer of this Universe.

### **A Cautionary Tale:**

The eminent Nobel Laurate physicist Prof. Ms. Lynda Johnson, 41, lives in Florida. She has been working hard to convert gravitational force into nuclear force and nuclear forces into gravitational forces for the last 15 years. Many brilliant research assistants are also working with Prof. Lynda. Ms. Lynda is successful in her efforts. She could be able to convert gravitational force into nuclear strong interaction force. The name of her invention is Graviton – Remote – Control.

Allen Brutus is the most dangerous and wicked Mafia Chief. One of Ms. Lynda's associates is Miss Diana Rossey. Miss Diana is the concubine of Brutus. With the help of Diana, Brutus kills Prof. Lynda Johnson and steals the Graviton – Remote – Control.

Brutus uses Graviton – Remote – Control (hereafter called GRC) for evil purposes. When he clicks the "destruction button" the important offices, industries, dams, research centers etc., explodes into pieces and ashes. GRC converts gravity around those places into strong interaction force and everything burns in a minute. All the combined forces of army, navy, airforce and ICBM (inter continental ballistic missiles) could not even reach the head quarters of Brutus. The reason in that Brutus has built with the help of GRC a strong graviton fence around his place. When all the sophisticated destruction missiles and robots approach the graviton fence, it swallows and nothing happens.

Brutus blackmails world leaders and people to obey him. His ambition is to rule the whole earth. He says that he is the GOD. All the effort, to defeat Brutus fails on earth.

Dr. Moses is one of the old students of physicist Lynda Johnson. He attempts to invent an antidote for GRC. Ultimately, after perpetual attempts round the clock, he has found an anti graviton remote control (Hereafter called AGRC). AGRC destroys graviton force built by Brutus. And, thank God, AGRC makes GRC vanish into gravity – space. Brutus is captured alive and put behind the bars.
